Responsive Cart/Checkout Deliverable

Prepared for: Becker's School Supplies
Prepared by: Sadie Saurdiff
Date: May 3, 2016

Changes Made:

- **All Steps:**
  - Increase the input label size to 14px (12px for optional text)
  - Increase the height of the fields to 45px
  - Expand the CTA buttons to full width
    - Leave 10px padding on the left and right
  - Update the mobile header to include the logo, account links and phone number.
    - In the checkout, include a 'Secure Checkout' message below the logo with a lock icon.
  - When a field is selected, show the correct keypad. (number pad for phone numbers, etc.)
  - Whenever an address is required, use ZIP code auto complete
  - **Form Validation Notes:**
    - Utilize the current validation functionality from the desktop site to highlight the field and display an error message below the field
      - When an error message is displayed, shift the following fields down to make room for the message
    - If a user attempts to continue and a form field triggers an error, auto-scroll back up to the first field that caused the error
- **Cart**:
  - Remove the breadcrumbs from the top
  - Mobile Responsive header and body
  - Trashcan icon for 'Remove' is turned into a link
  - Remove SubTotal Column
- **Login:**
  - Move the guest checkout to the top above the returning and new customer sections.
- **Step 1:**
  - Hide Promo Code box
  - In logged in state, check the first saved address by default
- **Step 2:**
  - Promo Code box will be exposed by clicking this link: Have a Promo Code? Click here to apply
  - Add check mark to front of Shipping text to show it's complete.
  - When not logged in, select the 'saved address' from the previous step in fill in the appropriate fields accordingly.
- **Step 3:**
  - Add check mark to front of Shipping text and Billing text to show it's complete.
  - Remove the third line of text at the top that describes how to change the shipping or payment method. Reduce the space between the remaining lines of text.
